ABSTRACT

This report contains data regarding the status of automatic data processing services in New Jersey's 581 operating public school districts during the spring of 1973. The survey was conducted through the use of a questionnaire that was developed in cooperation with the New Jersey Association for Educational Data Systems. It presents data in a tabular form with broad interpretations and assumptions relative to automatic data processing in the State's public school districts. The data reported in this publication include: the number of user districts, the number of students enrolled, equipment characteristics, equipment utilization, personnel employed, costs, and future plans. NARRATIVE SUMMARY

District Utilization (Table 1)

In April of 1973, 208 public school districts reported the use of automatic data processing equipment. This was thirty-six (36) percent of the operating public school districts. The majority of districts (119) reported using the equipment for administrative and instructional purposes. Fifty-nine (59) of the districts reported only administrative uses and thirty (30) districts reported only instructional uses.

Enrollments Affected (Table II)

Sixty-nine (69) percent of the students enrolled in New Jersey public school The largest number of affected students was in Essex County. The largest percentage districts were affected, directly or indirectly, by the use of punch card type equipment. of affected pupils was in Union County.

Ageacies Providing Equipment and Services (Table III)

ment used for administrative and instructional purposes. Equipment and services are Most of New Jersey's Public School Districts rent the data processing equipalso provided by a variety of sources from outside the district. Sources from outside the district that provided equipment or services were as

1. Service Bureau

2. Private firm

3. Another district

4. Other agencies.

Districts reporting "other agencies" may have secured services from municipalities, colleges, universities, or other governmental agencies.

Types of Records Processed By Computer Equipment (Table IV)

A rank order of the frequency of the five most popular applications follows:

ERIC*

Districts Using the Computer As An Instructional Tool (Table VI)

Problem Solving was the most common instructional use reported by school districts followed by Simulation and Experimentation. The following definitions were supplied for the question dealing with instructional applications:

1. Computer as a Tutor

As a tutor (a person employed to instruct another privately) and under the control of a previously prepared computer program, the computer helps the student to understand a concept and develop skills in using it. (Dictionary adaptation)

2. Simulation

A learning process which involves pupils as participants in role presentations and/or games simulating real-life situations or environments. (Handbook VI, U.S.O.E.)

3. Drill

An orderly, repetitive learning activity intended to help develop or fix a specific skill of aspect of knowledge. (Handbook VI, U.S.O.E.)

4. Experimentation

An activity involving a planned procedure accompanied by control of conditions and/or controlled variation of conditions together with observation of results for the purpose of discoverning relationships and evaluating the re-sonableness of a specific hypothesis. (Handbook VI, U.S.O.E.)

ERIC Full Taxt Provided by ERIC

5. Problem Solving

A thought process structured by the teacher (or student) and employed by the student for clearly defining a problem. (writing a computer program) forming hypothetical solutions, and possibly testing the hypotheteses. (Handbook VI, U.S.O.E.)

Future Plans of Prospective Users (Table VII)

eighteen (18) in 1974-75. The majority of new "users" were reported in Bergen and There were ten (10) districts planning to become users during 1973-74 and Middlesex counties.

Computer Characteristics (Table VIII)

Computer core sizes ranged from 4K to 97K. The most popular auxiliary storage unit The most popular computer core size reported, was in the 5 to 8 K range. was the disc.

the majority of terminals were located in Essex and Union Counties. In 1970 eighteen Communication terminals were reported in fourteen (14) counties, however, (18) terminals were reported in use, compared to one hundred and fifty-five (155) in 1973.

Rental and Maintenance Cost of Computers and Unit Record Equipment (Table X)

ed monthly rental costs of lest than one thousand dollars. Fifteen (15) districts The majority of computer and unit record punch card equipment users reportreported monthly computer rental costs in excess of two thousand dollars, and, six monthly unit record punch card equipment rental costs in excess .) (9)

ĽS.

of to

ERIC Full Text Provided by ERIC

Annual maintenance costs for the majority of computer users was less than two thousand dollars, but ranged as high as three thousand dollars for some districts.

maintenance costs of less than one thousand dollars, but costs in other unit record The majority of punch card unit record equipment users reported annual districts ranged as high as two thousand dollars per year. NOTE: Computer maintenance cost intervals appearing in Table X, are one thousand

dollars higher than the unit record equipment maintenance cost intervals.

Personnel (Table M)

staffed primarily by full time equivalent, (FTE), personnel numbering three or less New Jersey public school district computer and unit record installations are persons per installation. Twelve (12) of the reporting districts employed four (4) or more full time equivalent personnel for administrative purposes and four (4) districts reported employing four (4) or mor FTE personnel for instructional purposes.

(36) districts reported estimated personnel costs in excess of twenty thousand dollars The majority of the reporting districts estimated personnel costs in excess of ren thousand dollars per year for administrative and instructional purposes. Thirty-six per year in the administrative and instructional areas. 10

G. IF YOU OWN OR RENT EQUIPMENT LOCATED IN THE DISTRICT PLEASE COMPLETE THE FOLLOWING:

1. Installed computer system (Respond to cols. 3 to 8 with an "X" if applicable.)

Mag. Tape	1	0	Daimen	(Include No. of Communication
	A	~/	Printer	Terminals)
(5)	(6)	(7)	(8)	(9)
-	(5)	(5) (6)	(5) (6) (7)	(5) (6) (7) (8)

	RENTAL COST OF COMPUTER	SYSTEM \$
IF PURCHASED:	TOTAL COST	\$
	ANNUAL MAINTENANCE	\$
	YEAR PURCHASED	

2. Installed unit record punch card equipment (Respond to cols. 2 to 9 with an "X" if applicable.)

Unit Record System Manufacturer	Collator	Inter- Preter	Key- Punch	Key- Tape	Repro- ducer	Sorter	Tabu- lator	Verifier	Other (Specify)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
								· · · · · · · · · · · · · · · · · · ·	

TOTAL MONTHLY RENTAL COST	\$
IF PURCHASED: TOTAL COST	\$
ANNUAL MAINTENANCE	\$

H.	THE NUMBER	OF FULL	TIME EQUIVA	LENT (FTE)	PERSONS	EMPLOYED F	OR:
----	------------	---------	-------------	------------	----------------	------------	-----

- 1. Administrative processing
- 2. Utilizing the computer as an instructional tool

I. THE ANNUAL COST OF THE PERSONNEL EMPLOYED IN ITEM "H" FOR:

- 1. Administrative processing \$ ______
- 2. Utilizing the computer as an instructional tool \$
- J. THE TOTAL ANNUAL ESTIMATED COST (PRESENT FISCAL YEAR) FOR ALL DATA PROCESSING EXCLUDING PERSONNEL \$
- K. ARE YOUR DATA PROCESSING FACILITIES AVAILABLE FOR CONTRACT WORK?
 - 1. YE

2. NO
